SOHAM MALEKAR

Mumbai, Maharashtra | soham.malekar@gmail.com | github.com/soham-malekar | linkedin.com/in/soham-malekar

PROFESSIONAL SUMMARY

Information Technology student (Diploma, 89.03%) passionate about Artificial Intelligence, Blockchain Development, Full Stack Development, and Cybersecurity. Experienced in building real-world projects, training 43+ students in blockchain concepts, winning hackathons, and developing AI-powered applications. Currently exploring Machine Learning, Computer Vision, and Quantum Computing.

EDUCATION

B.Tech in Artificial Intelligence and Data Science — **Pursuing**

Vidyalankar Polytechnic — Diploma in Information Technology — **2023 – 2026**
Percentage: 89.03%

St John Universal High School — ICSE Board — **2013 – 2023**

EXPERIENCE

Cybersecurity Intern — **2025**
- Learned vulnerability assessment, attack surface analysis, and secure development practices.
- Gained practical exposure to cybersecurity fundamentals.

Blockchain Trainer — **2026**
- Trained 43+ students in Blockchain and Web3 concepts across workshops.
- Conducted technical sessions and mentored beginners in smart contracts and DeFi.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, TypeScript, HTML, CSS, SQL
Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS
Databases: MongoDB, MySQL, PostgreSQL, Supabase, Firebase
Technologies: AI/ML, Computer Vision, YOLOv8, Blockchain Development, Cybersecurity, Prompt Engineering, Linux
Tools: Git, GitHub, Postman, VS Code, Anaconda, Figma, Canva
Core: Data Structures, Operating Systems, Communication Skills
Spoken Languages: English, Hindi, Marathi

PROJECTS

Space Station Safety — Object Detection
Space-themed web app for real-time monitoring of critical safety equipment. Upload images to detect Oxygen Tanks, Fire Alarms, and First Aid Boxes using YOLOv8 CV model. Features detection history, batch analysis, and model retraining capabilities.

World Echo — Echo-Gen
Interactive AI-generated world built on LingBot World 2 (Reactor). Explore a living Indian marketplace at sunset and interact with Arin, a persistent merchant NPC, through natural-language actions — while the game silently builds an “echo” memory of who you are.

Event Verification System
Blockchain-based platform for secure, tamper-proof event certificate verification using smart contracts.

Neuron – Decentralized GPU Marketplace
Blockchain-powered marketplace connecting users with distributed GPU resources for AI workloads.

Quantum Entanglement Lab
Interactive quantum computing simulation platform demonstrating quantum entanglement concepts through visualization.

Personal Portfolio Website
Modern responsive portfolio built with Next.js, React, and Tailwind CSS featuring smooth animations and interactive UI.

HACKATHONS & COMPETITIONS

- Smart India Hackathon – Grand Finale Qualifier
- ETHGlobal
- BNB Chain Hackathon
- Avalanche Hackathon
- Monad Hackathon

ACHIEVEMENTS

- Won ETH Mumbai Hackathon – Sponsors Track
- Won College-hosted Hackathon
- Smart India Hackathon Grand Finale Qualifier
- Diploma in Information Technology – 89.03% aggregate
- Trained 43+ students in Blockchain and Web3 concepts
- Participated in multiple national and Web3 hackathons (ETHGlobal, BNB Chain, Avalanche, Monad, Stellar)
